

Re: Residual Solvents

To: all active and provisional cultivators, micro-cultivators, producers, product manufacturers, food & beverage manufacturers, product packagers

Please be advised that, per Adult Use Policies and Procedures Section 21a-421j-26 (9)

Cannabis shall not be produced or manufactured (1) in the presence of a pesticide chemical not authorized by the commissioner, or (2) using a solvent other than, as confirmed by cannabis testing laboratory testing, (1) a United States Pharmacopeia 467 Class 3 organic solvent, (2) a solvent Generally Recognized as Safe pursuant to the Federal Food, Drug and Cosmetic Act, or (3) a solvent approved by the Department.

Please be advised that any solvents used in the production/manufacturing of cannabis product/s, **including terpenes and minor cannabinoids** incorporated in compliance with section 21a-421j-26(a)(3-4), must be declared and tested for at the time of final product testing.
