Consumer Protection

Hello,

Please be reminded that pre-roll wrappers (excluding a filter not intended for combustion) are considered an ingredient and are therefore subject to the testing requirements under 21a-421j-30 of the Adult Use Cannabis Policies and Procedures.

21a-421j-26(b) A cannabis product that contains cannabis flower in pre-rolled form for the purpose of combustion may:

- (1) display a logo of a cannabis establishment on the wrapping of the pre-roll, which wrapping is intended for combustion and inhalation and is considered an ingredient in such cannabis product; and
- (2) contain a filter, which is not intended for combustion and not considered an ingredient, which filter may include the logo of a cannabis establishment.

Thank you.
