Measure Alignment with Selection Criteria

Criterion	Measure Alignment
1. Represents an opportunity to promote health equity	
2. Represents an opportunity for improvement in quality of care	
3. Accessible with minimal burden to the clinical mission	
4. Evidence that the measured structure/process/outcome correlates with improved patient health	
5. Addresses the most significant health needs of CT residents	
6. Measure and method is valid and reliable	
7. Useable, relevant, and has a sufficient denominator size	

If the measure is homegrown, please describe steps taken to validate the measure:
